

Community Plan
Shaping the Western Suburbs

2027

foreword

The City of Charles Sturt is ideally situated in the western suburbs of Adelaide – close to the City of Adelaide, the beach, the River Torrens Linear Park, the airport, shopping facilities and major sporting and entertainment venues. The City is characterised by diversity in land use, having a balance of residential, industrial and commercial activity; and diversity in people in terms of culture, age and socioeconomic character.

The City is experiencing rapid change and in the face of this change, it is important that we recognise and respond to these challenges and ensure that the western suburbs continue to be a highly desirable place to live now and in the future.

'The City of Charles Sturt Community Plan - Shaping the Western Suburbs 2027' is an ambitious vision, resulting from an unprecedented collaboration with the community to determine the characteristics of the City that you, the community, want to live, work and be a part of in 2027.

In the past, Council's Strategic Planning Framework has consisted of a four year Strategic Plan (Our Strategic Drivers), a Corporate Business Plan, Divisional and Portfolio Business Plans and Personal Development Agreements. It was identified that the key missing component of this framework was an understanding of the community's aspiration for the future of the City.

A community consultation effort spanning six months and engaging with in excess of 2,000 residents, visitors and businesses through qualitative and quantitative research has resulted in 'The City of Charles Sturt Community Plan - Shaping the Western Suburbs 2027'.

The Plan will provide us with a focus for our business activity and will be implemented through our Corporate Strategic Plan (four year framework) and Divisional and Portfolio Business Plans and Personal Development Agreements (annual plans). We will report on achievements annually and at the same time review the Community Plan to ensure we are continuing to head in the right direction.

As an organisation of committed staff and Council Members, we look forward to working towards *Shaping the Western Suburbs 2027*.

Chief Executive
Mark Withers

Mayor
Harold Anderson AM, JP

“ Shaping the Western Suburbs 2027’ is an ambitious vision, resulting from an unprecedented collaboration with the community to determine the characteristics of the City that you, the community, want to live, work and be a part of in 2027.”

introduction

Section 122 of the Local Government Act 1999 requires all councils to have strategic management plans which identify the objectives for its area over a period of at least four years and take into account, or are consistent with public policy objectives and strategies of other levels of government.

Since 2002, the City of Charles Sturt's strategic direction has been guided by 'Our Strategic Drivers 2002-2007'. That document provided us with a broad direction to create and maintain a socially, environmentally and economically sustainable community through the implementation of a series of strategies and projects. The document was also reflected in our Corporate Business Plan, Annual Portfolio and Business Plans and Personal Development Agreements.

In April 2007, Council undertook an extensive review of its Strategic Planning Framework and embarked on the preparation of a Community Plan (a 20 year community vision) in conjunction with the community of Charles Sturt to determine the sort of City people want to live, work and be part of in the future. Through this process we sought the views of some 2,000 residents, businesses and visitors to the City and the results are reflected in this document – 'The City of Charles Sturt Community Plan - Shaping the Western Suburbs 2027'.

There are a number of challenges facing the City today and into the future including an ageing population, urban consolidation and climate change to name a few, and it is important that we understand the future our community aspires to and ensure that we position ourselves to respond either as a provider, partner or advocate. In this way we can work towards providing a better future for generations to come.

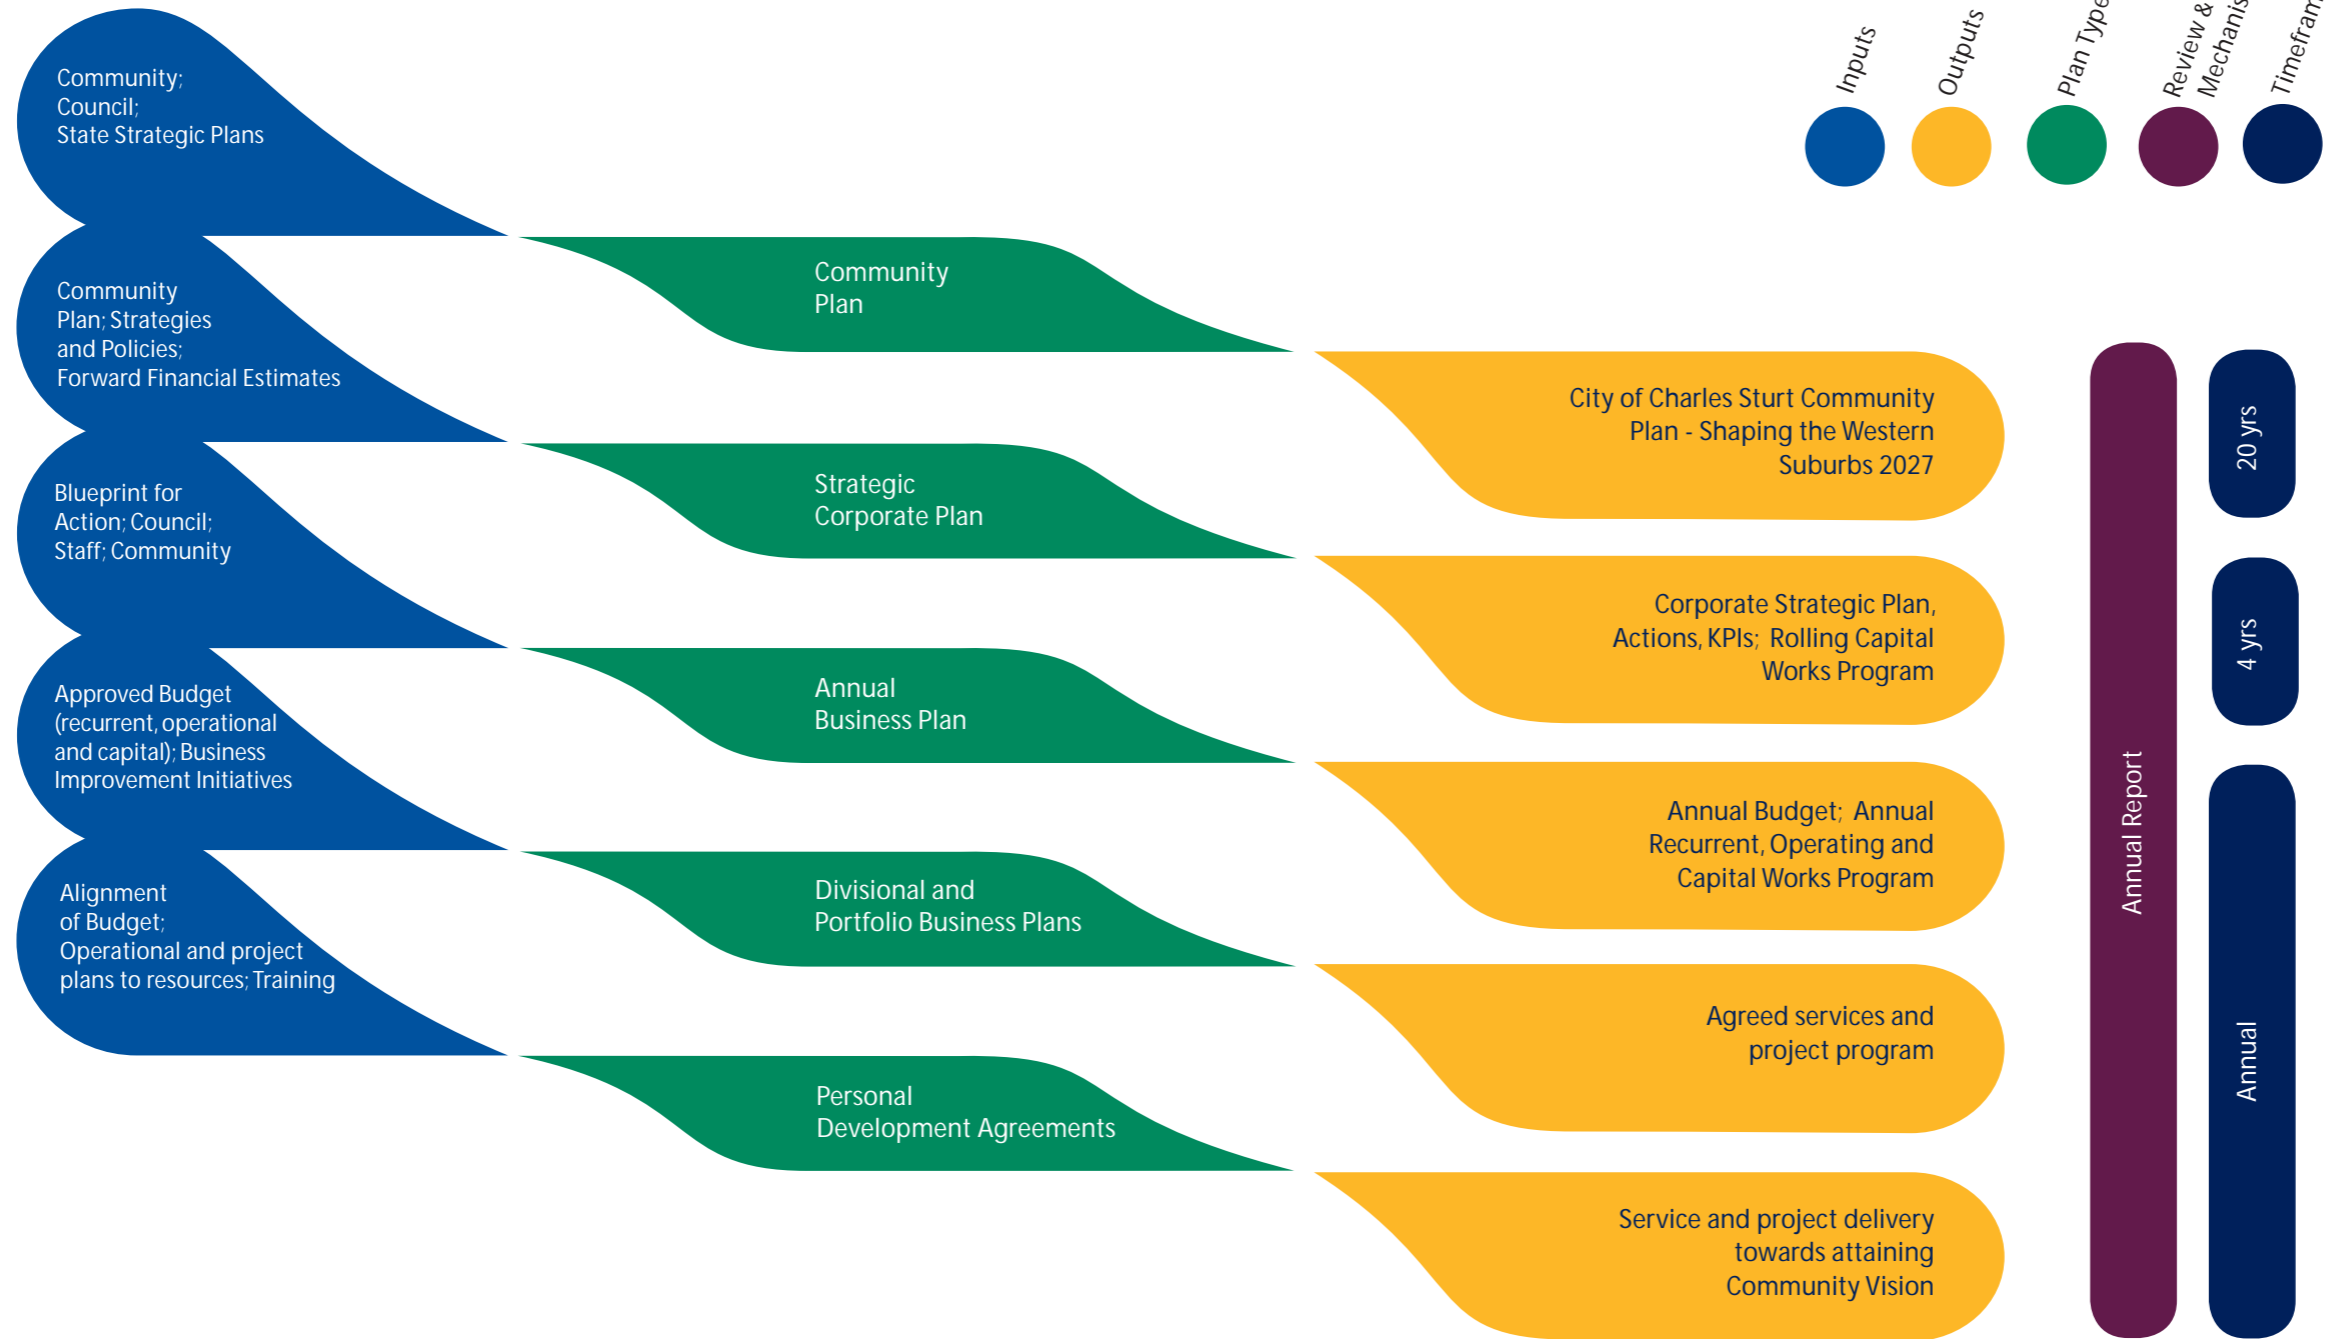

The community's aspirations are documented in 'The City of Charles Sturt Community Plan - Shaping the Western Suburbs 2027,' which is the lead document in our Strategic Planning Framework (Refer Diagram 1) and be reflected in our four year Corporate Strategic Plan which outlines actions, responsibilities and timeframes that will contribute to achieving the 20 year plan. In turn, this will be reflected in Annual Business Plans and Personal Development Agreements. Progress and achievements will be reported through the Annual Report. In addition, Council Policy, Strategic Management Plans and Development Plans will be reviewed and adjusted as required to ensure alignment with 'The City of Charles Sturt Community Plan - Shaping the Western Suburbs 2027'.

“ ...it is important that we *understand the future* our community aspires to and ensure that we position ourselves to *respond* either as a provider, partner or advocate. In this way we can *work towards providing a better future for generations to come.*”

strategic plan structure

Diagram 1: Strategic Planning Framework

snapshot of the city

The City of Charles Sturt was proclaimed on 1 January 1997 as a result of the amalgamation of the former City of Hindmarsh Woodville and the City of Henley and Grange. The City is situated west of the Central Business District of Adelaide, South Australia extending to the coast and has a population of 100,500.

People choose to live in the City because it is close to the beach, the City (of Adelaide), the port, the airport and regional shopping facilities. The City of Charles Sturt has long been considered the sporting and entertainment hub of Adelaide with national basketball, soccer and football stadiums, three privately owned golf courses, an international rowing course, the River Torrens Linear Park, the coast and numerous highly regarded local sporting venues in the area. The City is also well catered for in terms of schools, medical services, local sporting and community facilities including libraries and community centres.

The population of Charles Sturt is older than that of metropolitan Adelaide with a higher proportion of people aged 65 and over, and a lower proportion aged 14 years and under (compared to metropolitan Adelaide). While most of the occupied dwellings within the City are occupied by families, the City has a high proportion of single person households compared to metropolitan Adelaide. The City is culturally diverse with in excess of 100 cultures represented.

The City has evolved since the early days of settlement of Adelaide and is characterised by a mix of residential, industrial and commercial land uses including contemporary and highly valued heritage areas. Open space is scarce in some of the older suburbs, however the quality is generally high. The transport networks within the City are well developed with public transport providing good access to the City of Adelaide.

The total value of the City's assets is in the order of \$665 million and includes roads, footpaths, stormwater, property and buildings such as sporting facilities, libraries and community centres – all offering services to the local community. In addition, the Council provides a vast range of services, programs and activities to ensure the City is safe, vibrant and attractive and continues to attract people to live, work and visit.

• a safe city

• iconic local places

• a heritage city

• quality of life

• local sporting facilities

• integrated transport network

• 100 cultures

• local community facilities

• a contemporary city

• a mixed-use city

• community centres

• an attractive city

• quality governance

• entertainment hub

• environmental performance

• a diverse city

• a vibrant city

*“ ‘Shaping the Western Suburbs 2027’ reflects a City that is changing rapidly and a community that is proud of its diverse heritage and seeks to **shape its future.**”*

structure

(How to read this plan)

'The City of Charles Sturt Community Plan - Shaping the Western Suburbs 2027' reflects input from more than 2,000 residents, visitors and businesses within the City of Charles Sturt. Qualitative and quantitative community consultation, engagement and market research was undertaken between June and October 2007. The many thousands of ideas and comments have been summarised into the following pages.

Vision: 'Shaping the Western Suburbs 2027' reflects a City that is changing rapidly and a community that is proud of its diverse heritage and seeks to shape its future.

Outcomes: The four key theme areas that will contribute to the vision being realised. These include both a simple and descriptive outcome statement that captures the range of ideas expressed.

Objectives: Describes what the community wants to achieve under each outcome area.

Strategies: Describes the longer term action required to achieve the objective.

Success Factors: Tells us how we will know when the strategies have been successful.

Relevant State Target: Refers to the relevant targets from the South Australian State Strategic Plan 2007. It is important to note that our objectives and strategies will not in themselves achieve State targets, but will contribute to their realisation. State Targets are listed at the end of Strategies. Eg. (T5.6)

Delivery, Monitoring and Reporting: 'The City of Charles Sturt Community Plan - Shaping the Western Suburbs 2027' will be achieved through our 'Corporate Strategic Plan' which will have a series of actions to be implemented over a four year period. Each action will have key performance indicators or targets and Council will report to the community annually on the achievements of the Corporate Strategic Plan while at the same time reviewing future actions and targets to ensure we focus on achieving the outcomes outlined in the Community Plan.

outcome 1

A safe and healthy City that supports vibrant community life

“ Encourage sharing and celebration of our cultural diversity” (Objective 1.5)

In 2027 the City is characterised by diversity in lifestyle and culture which is valued, respected and celebrated by the community. The City is home to many communities, each with their own unique natural, built and social characteristics. Despite the diversity these communities have much in common – they value the strong sense of connection they have with their area and the people living in it. Each community has a unique configuration of iconic local places and facilities – many in easy walking distance for socialising, sharing art and culture or participating in healthy activities. People feel safe here – and that is so important to quality of life – for everyone,

but particularly for older residents who enjoy being able to stay living in their own homes in the area. People here value fairness and support those in need. There is a strong volunteering ethos across people of all ages, with residents actively engaged in and contributing to, community life. Council provides sporting and community clubs, community centres and libraries and advocates for medical, health, education, transport and support services that suit the needs of the community. Employment opportunities exist within the City to enable residents to support themselves and the lifestyle they choose to live.

objective 1.1

Encourage strong, supportive local communities

Strategies

1.1.1 Use an integrated local neighbourhood framework to plan and deliver services and activities

1.1.2 Provide opportunities for people to connect and interact locally

1.1.3 Develop, support and promote local community clubs and networks

1.1.4 Enhance civic leadership and community involvement (T5.6)

1.1.5 Cultivate a strong sense of identity and community across local neighbourhoods (T4.4)

Success Factors

Residents feel connected to their local area through access to appropriate and relevant services and activities

Well used, private and public places (such as parks, sports clubs, libraries/ community centres, local cafes and shops) are within walking distance

Seamless connections (movement options/roads, footpaths and cycle paths, open space) are created between developments

Residents are aware of options available to them and participation in community activity increases

Increase in the number of volunteers supporting Council programs and working in the community

Residents actively participate in improving the amenity of their local area

Residents feel a strong sense of place and pride in the community

objective 1.2

Contribute to the quality of life of all individuals in the community

Strategies

1.2.1 Facilitate equitable access to facilities, activities and services and information particularly by those most in need (T2.4, T2.5, T2.7)

1.2.2 Advocate for the provision of relevant and accessible education, health, medical, transport and support services to meet the needs of the community (T2.4, T2.5, T2.7)

1.2.3 Promote Council services and activities available within the City (T2.4, T2.5, T2.7)

Success Factors

Residents have access to a range of activities and support services that assist in improving their quality of life

Residents have equitable access to relevant education, health, transport and support services based on need

Residents are aware of the services and activities available to them within the City

objective 1.3

Encourage healthy lifestyle pursuits

Strategies

1.3.1 Provide multi-purpose sport and community centre/library facilities

1.3.2 Provide safe, accessible and affordable sport and recreation venues (T2.2, T2.3)

1.3.3 Promote and encourage increased participation in organised sport, active recreation and healthy lifestyle activities (T2.2, T2.3)

1.3.4 Provide information and resources to support and encourage a healthy community

Success Factors

Community facilities that provide a wide range of activities and services to the community and are well utilised

Membership of sporting clubs is open to all residents and membership levels are increased across the City

Participation in sport and recreation is equivalent to or exceeds the national average

The community is well informed about community health services

objective 1.4

Contribute to an improved sense of safety

Strategies

1.4.1 Advocate for an increased commitment to crime prevention by other levels of government

1.4.2 Design for and promote safe and responsible use of streets and public places

1.4.3 All new private and public developments are designed for safety

Success Factors

Reduction in criminal activity coupled with an increased perception of safety

Reduction in traffic and other offences and an increased perception of safety in public areas

Increased sense of safety and improved access in new private and public developments

objective 1.5

Encourage sharing and celebration of our cultural diversity

Strategies

1.5.1 Respect, support and celebrate our Aboriginal heritage, guided by the Kurna community (T4.5)

1.5.2 Support local events that share and celebrate our multicultural heritage (T5.8)

1.5.3 Assist our diverse cultures to connect and integrate with the community (T5.8)

1.5.4 Promote and encourage increased participation in art and cultural activities (T4.4)

Success Factors

Increased understanding and respect for our Aboriginal heritage

Multicultural events become a feature of the social calendar of all residents of the City

Increased understanding and sharing of cultures

Opportunities are provided for performing and visual art

“ Encourage sharing and celebration of our cultural diversity...

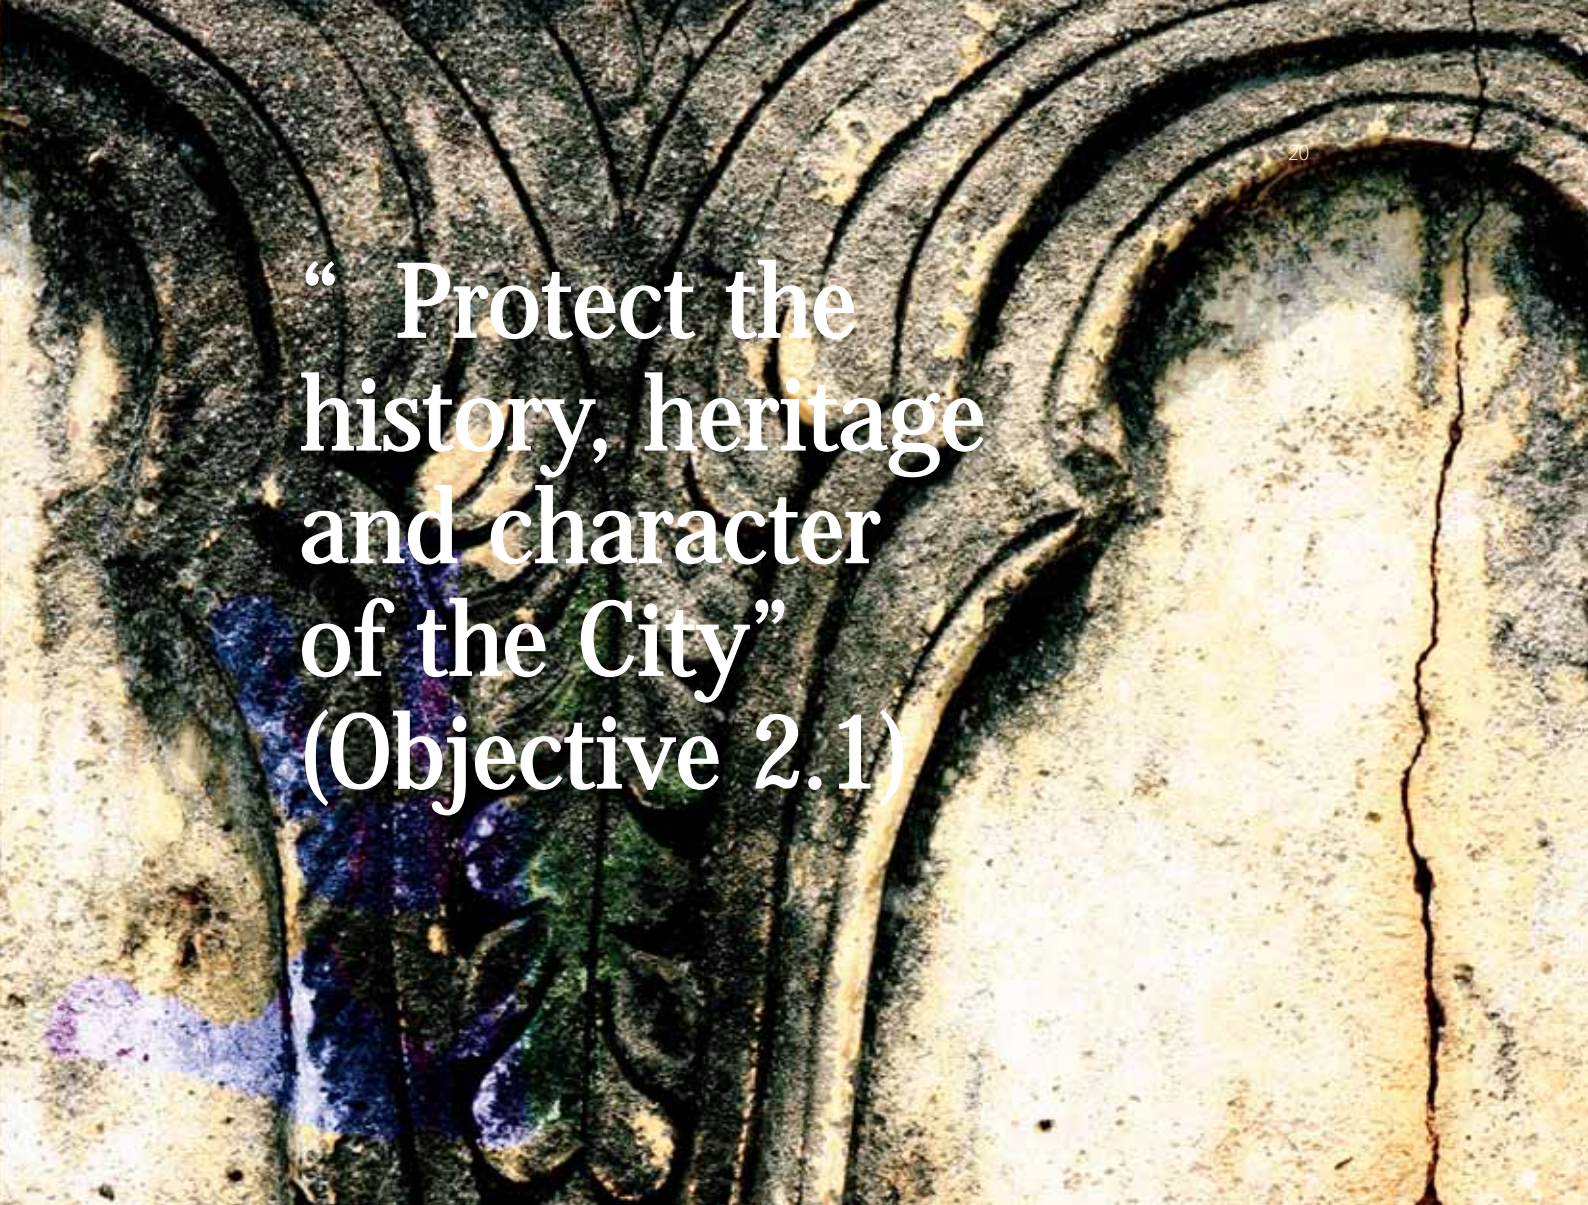

1.5.3 Assist our diverse cultures to connect and integrate with the community”

outcome 2

An economically prosperous, attractive and functional City

A close-up photograph of ancient stone carvings, possibly from a temple or palace. The stone is dark and weathered, with a vibrant rainbow-like patina of colors (red, orange, yellow, green, blue, purple) covering parts of the surface. The carvings are intricate, showing arches and floral motifs. The lighting is dramatic, highlighting the textures and colors.

“ Protect the
history, heritage
and character
of the City”
(Objective 2.1)

In 2027 our City reflects a balanced mix of land uses where people can live, work and participate in leisure activities without having to leave the area. Our housing caters for the differing needs of the community with higher density housing serviced by well used transport hubs and lower density housing in our well preserved heritage zones. Our open space network provides a wide range

of activities for everyone and there are plenty of things to do and local places for people to go. Our well maintained and integrated transport network of footpaths, cycle paths, roads and public transport ensure safe and convenient access for everyone. Everyone takes pride in the City and this is reflected in the attractive public and private landscape.

objective 2.1

Protect the history, heritage and character of the City

Strategies	Success Factors
<p>2.1.1 Identify and protect features of historic significance throughout the City</p>	<p>Historic features identified and protected</p>
<p>2.1.2 Identify and protect local character zones for the historic, iconic or unique features they contribute</p>	<p>Character zones identified and protected</p>
<p>2.1.3 Understand and protect the history and heritage of the City</p>	<p>Understanding of stories associated with the City</p> <p>Awareness of the stories of the history of the City</p>
<p>2.1.4 Create stronger linkages between the City and recognised iconic sites within the City</p>	<p>The public area surrounding iconic sites are attractive, functional and well maintained</p>

objective 2.2

Support and encourage a diverse mix of complementary land uses

Strategies

2.2.1 Provide for appropriately located, mixed density housing that caters for our diverse population (T1.22, T6.7)

2.2.2 Encourage the provision of well designed, accessible, vibrant, local and regional shopping facilities

2.2.3 Encourage business investment in appropriately located, attractive commercial and industrial precincts which complement adjoining land uses

Success Factors

Our population consists of people from a range of age, socioeconomic and cultural groups living in appropriate housing of mixed character, density and affordability

Shopping needs are met within the City of Charles Sturt and shopping facilities are attractive hubs of community activity

A balanced mix of industry and business providing local services and employment opportunities that are attractive and compatible with adjoining land uses

objective 2.3

Provide and facilitate a safe, connected and well maintained transport network

Strategies

2.3.1 Develop and maintain a safe network of connected cycle and pedestrian routes

2.3.2 Manage local road networks for the safe movement of people, goods and services (T2.9, T2.10)

2.3.3 Advocate for a connected, reliable, safe and well maintained public transport system including options for light rail (T3.6)

2.3.4 Advocate for a connected safe and well maintained major road network including a north south transport corridor (T2.9, T2.10)

Success Factors

Increased use of the cycling and pedestrian network for commuter and leisure purposes

Increased sense of safety from people using the local road network

Increased use of public transport by residents, visitors and workers

Increased sense of safety from people using the major road network

objective 2.4

Create attractive, well maintained streetscapes

Strategies

2.4.1 Coordinate the upgrade of street infrastructure

2.4.2 Create and maintain attractive landscaped streetscapes which incorporate principles of water sensitive urban design

Success Factors

All streets where elements are to be upgraded within a five year period of each other are integrated into one project

All street tree plantings contribute to uniform plantings for the given street and are suitable for the climate and the region

objective 2.5

Establish and maintain a linked system of open space

Strategies

2.5.1 Create an accessible network of developed open space that responds to the recreation and sporting needs of the community

2.5.2 Develop environmentally sustainable landscapes within public open space

2.5.3 Ensure that new developments have access to useable private and public open space

Success Factors

All residents within walking distance of a developed local park

Community sports facilities are accessible, well used multi-purpose community hubs

All new open space development incorporates demonstrable sustainable development

New residential developments have a developed local park within walking distance

“ Establish
and maintain
a linked system
of open space...

2.5.1 Ensure that
new developments
have access to
useable private
and public open
space”

objective 2.6

Manage the community's infrastructure

Strategies

2.6.1 Ensure that community centres, libraries and civic buildings are well maintained (T1.21)

2.6.2 Ensure that open space and sports grounds assets are well maintained

2.6.3 Ensure that road, bicycle and footpath infrastructure are adequate and well maintained

2.6.4 Ensure that stormwater systems are well maintained

Success Factors

A proactive approach is taken to the maintenance of community infrastructure underpinned by asset management plans and within the framework of relevant legislation and financial constraints

objective 2.7

Encourage local business and employment opportunities

Strategies

2.7.1 Encourage the establishment of business hubs and home based employment

2.7.2 Advocate for government support for local education, training and employment intervention (T1.10, T1.11)

2.7.3 Identify initiatives that support and promote local business

2.7.4 Advocate for the development of faster broadband access for businesses and homes (T4.8)

Success Factors

A variety of employment opportunities exist to support our diverse community

A variety of education and training opportunities exist to assist people into the employment market

Local businesses are known and valued within the community

All businesses and homes have access to broadband

outcome 3

A City which values, protects and enhances the natural environment

“ Promote ecologically sustainable urban development within the City”
(Objective 3.3)

In 2027 our City exists harmoniously with our natural surrounds. The community, Council, business and other levels of government work in partnership to ensure that future generations are able to enjoy a quality of life. Our natural ecosystems including the coast, waterways and biodiversity corridors are functioning well, supporting an abundance of plant and animal life. We are celebrating our natural environment and recognise its importance for our

health and wellbeing. All development within the City is underpinned by the principles of energy and water efficiency and waste minimisation. A significant portion of our energy demand is replaced by renewable energy sources like solar and wind. We are sharing our transition story with other cities locally and globally and advocating for our neighbours, contractors and suppliers to achieve similar levels of environmental performance.

objective 3.1

Protect and restore the City's biodiversity, natural ecosystems and water courses

Strategies

3.1.1 Protect and expand native flora and fauna with an emphasis on functioning ecosystems and vegetation corridors (T3.1, T3.2)

3.1.2 Protect and enhance the coast (T3.2)

3.1.3 Promote understanding and appreciation of the value of natural areas

3.1.4 Promote and advocate for the protection and rehabilitation of our inland waters

Success Factors

Key ecosystems are protected and native flora and fauna are in abundance

The coast is protected and native flora and fauna are in abundance

The natural environment is recognised and valued

Water quality within inland waters is improved

objective 3.2

Encourage our community to better manage and reduce their impact on the environment

Strategies

3.2.1 Encourage energy efficiency and greenhouse gas emission reductions across the community (T3.5)

3.2.2 Encourage water consumption reduction amongst the community (T3.9)

3.2.3 Promote waste reduction (T3.8)

3.2.4 Encourage and support individual action through Council programs and facilities

3.2.5 Encourage our community and stakeholders to work towards a common sustainable future

3.2.6 Investigate opportunities for financial incentives to support environmental initiatives

Success Factors

Greenhouse gas emissions are reduced

Local air quality is maintained or improved

Potable water consumption is reduced

Waste to landfill is decreased

Greater awareness amongst the community of programs and facilities

Partnerships are strengthened and greater collaboration of resources dedicated to achieving environmental objectives within the City

The community is actively working towards reducing its ecological footprint

objective 3.3

Promote ecologically sustainable urban development within the City

Strategies	Success Factors
<p>3.3.1 Ensure development controls reflect the principles of ecologically sustainable development (T3.14)</p>	<p>The number of five star energy and water efficient commercial and residential buildings is increasing</p>
<p>3.3.2 Encourage water sensitive urban design in all new developments (T3.9)</p>	<p>Water sensitive urban design principles are adopted within all public and private developments</p>
<p>3.3.3 Investigate and implement sustainable stormwater management practices that reduce discharge into the Gulf (T3.9, T3.4)</p>	<p>Reduced volume of stormwater and improved water quality discharged into the Gulf</p>
<p>3.3.4 Plan for climate change</p>	<p>Impacts of climate change are understood and local actions are in place to respond</p>

objective 3.4

Reduce the environmental impact of Council's operations

Strategies

3.4.1 Integrate environmental considerations into Council planning, operational and reporting processes

3.4.2 Reduce Council's energy demand and subsequent greenhouse gas emissions (T3.13)

3.4.3 Reduce Council's water consumption (T3.9)

Success Factors

Sound environmental information and reporting has led to a greater understanding of environmental impacts with impacts continually being measured and reduced

Energy efficiency has improved and greenhouse gas emissions are reduced. Where greenhouse gas emissions are unavoidable they are offset (by the acquisition of certified carbon credits)

Council's water consumption is reduced and amenity is maintained through changing landscapes

outcome 4

A local organisation providing progressive leadership, accountable governance and quality services to the community

An abstract graphic featuring a large blue diamond shape in the center. To the left of the diamond is a vertical red shape with horizontal stripes. Below the diamond are several yellow wavy lines. The background is a dark blue with some lighter blue and purple textures.

“ Ensure the community is well informed and actively engaged” (Objective 4.1)

In 2027 we are recognised as a leading and progressive Council that actively informs and engages with its community. Council members and staff are well regarded in the community for their professionalism and accountable and transparent decision making. The City is well managed with quality governance and financial management structures in place to assure its long term sustainability. The community understands and values the breadth and quality of services provided and how they are funded and is confident that rates are well spent.

objective 4.1

Ensure the community is well informed and actively engaged

Strategies

4.1.1 Improve communication with residents, ratepayers and businesses in ways that are relevant and easily understood

4.1.2 Engage the community in ways that enable Council to make balanced and well informed decisions

4.1.3 Ensure decision making is accountable and transparent

4.1.4 Encourage active citizenship and community pride (T5.5)

4.1.5 Monitor and report on progress of the implementation of the Community Plan annually

Success Factors

The community is well informed and knowledge of Council services and projects is increased

The community is satisfied that Council listens and acts on its advice and understands the decisions made

Council makes well informed decisions based on sound governance principles

Increased participation in elections and community engagement activities and increased 'sense of ownership' of the City

Community Plan achievements are realised and reviewed and updated on a regular basis

objective 4.2

Recognition as a leading organisation delivering best practice in local government management

Strategies

4.2.1 Establish efficient work procedures and systems that deliver timely and cost effective services

4.2.2 Provide best practice, innovative solutions to meet the challenges facing the City

Success Factors

Community satisfaction reflects that community needs are being met

The City of Charles Sturt is seen as a leader in local government

objective 4.3

Ensure the organisation is financially accountable and sustainable

Strategies

4.3.1 Ensure the City's operations are sustainable in an economic, social and environmental context

4.3.2 Strive to establish a reputation as an employer of choice attracting high calibre staff (T2.12)

4.3.3 Ensure the rating system takes into account the diverse financial circumstances of the community

Success Factors

Sustainability reporting is in place and budget decisions are made within the context of long term financial and asset management plans

Staff within Council are creative, innovative and well regarded both within their profession and the community

The community continues to reflect a diverse range of ages and socioeconomic character

objective 4.4

Deliver quality service to our customers

Strategies

4.4.1 Provide a high standard of customer service

4.4.2 Ensure services provided by Council are relevant and meet the needs of the community (T1.7)

4.4.3 Advocate for enhanced service provision by other levels of government to meet the identified needs of the community

4.4.4 Develop partnerships with other local government and service providers

Success Factors

The community has a high regard for customer service provided by the Council

Community satisfaction reflects that community needs are being met

Services provided by other levels of government are maintained or enhanced

Council works in a regional and metropolitan context

A close-up photograph of a sandy beach. In the center, a round, dome-shaped sandcastle sits on the sand. To the left, a child's hand is visible, holding a blue plastic shovel. The sand is light brown and textured. The text "the shape of things to come..." is overlaid in the lower right quadrant of the image.

**the shape of
things
to come...**

relevant state strategic targets 2007

The following State Strategic Targets have been cross-referenced to the applicable strategies within the City of Charles Sturt Community Plan. It is important to note that the strategies within the Community Plan will not in themselves achieve the targets of the State Strategic Plan but will contribute to their achievement.

T1.7	Performance in the public sector - customer and client satisfaction with government services (new): increase in the satisfaction of South Australians with government services by 10% by 2010, maintaining or exceeding that level of satisfaction thereafter.	T3.4	Marine biodiversity (existing - modified): by 2010 create 19 marine parks aimed at maximising ecological outcomes.
T1.10	Jobs (existing): better the Australian average employment growth rate by 2014.	T3.5	Greenhouse gas emissions reduction (existing - modified): achieve the Kyoto target by limiting the state's greenhouse gas emissions to 108% of 1990 levels during 2008-2012, as a first step towards reducing emissions by 60% (to 40% of 1990 levels) by 2050.
T1.11	Unemployment (existing – modified): maintain, equal or lower than the Australian average through to 2014.	T3.6	Use of public transport (existing - modified): increase the use of public transport to 10% of metropolitan weekday passenger vehicle kilometres travelled by 2018.
T1.21	Strategic Infrastructure (existing – modified): match the national average in terms of investment in key economic & social infrastructure.	T3.8	Zero waste (existing): reduce waste to landfill by 25% by 2014.
T1.22	Total population (existing - modified): increase South Australia's population to 2 million by 2050, with an interim target of 1.64 million by 2014.	T3.9	Sustainable water supply (new): South Australia's water resources are managed within sustainable limits by 2018.
T2.2	Healthy weight (existing – modified): increase the proportion of South Australians 18 and over with healthy weight by 10 percentage points by 2014.	T3.13	Energy efficiency – government buildings (existing - modified): improve the energy efficiency of government buildings by 25% from 2000-2001 levels by 2014.
T2.3	Sport and recreation (existing): exceed the Australian average for participation in sport and physical activity by 2014.	T3.14	Energy efficiency - dwellings (existing): increase the energy efficiency of dwellings by 10% by 2014.
T2.4	Healthy South Australians (existing – modified): increase the healthy life expectancy of South Australians by 5% for males and 3% for females by 2014.	T4.4	Cultural Engagement – arts activities (new): increase the number of attendances at selected arts activities by 40% by 2014.
T2.5	Aboriginal healthy life expectancy (new): lower the morbidity and mortality rates of Aboriginal South Australians.	T4.5	Understanding of Aboriginal culture (new): Aboriginal cultural studies included in school curriculum by 2014 with involvement of Aboriginal people in design and delivery.
T2.7	Psychological wellbeing (existing – modified): equal or lower than the Australian average for psychological distress by 2014.	T4.8	Broadband Usage (existing – modified) in South Australia to exceed the Australian national average by 2010, and be maintained thereafter.
T2.9	Road safety – fatalities (existing – modified): by 2010 reduce serious injuries to less than 1000 per year.	T5.5	Local government elections (existing): increase voter participation in local government elections in South Australia to 50% by 2014.
T2.10	Road safety – serious injuries (new): by 2010 reduce serious injuries to less than 1000 per year.	T5.6	Volunteering (existing - modified): maintain the high level of volunteering in South Australia at 50% participation rate or higher.
T2.12	Work-life balance (new): improve the quality of life of all South Australians through maintenance of a healthy work-life balance.	T5.8	Multiculturalism (new): increase the percentage of South Australians who accept cultural diversity as a positive influence in the community.
T3.1	Lose no species (existing - modified): lose no known native species as a result of human impacts.	T6.7	Affordable housing (existing - modified): increase affordable home purchase and rental opportunities by 5 percentage points by 2014.
T3.2	Land biodiversity (existing - modified): by 2010 have five well-established biodiversity corridors aimed at maximising ecological outcomes particularly in the face of climate change.
