

CITY OF CHARLES STURT

Strategic Cycling Corridors

Our cycling network is an important feature of our City, linking the community to important destinations within our City and to the wider Metropolitan area. We have a target to increase cycling trips in our City from the current level of 3% of all trips to 6% by 2031. We have recently developed a Bike Network Action Plan to assist in achieving this target. You can view this plan at yoursaycharlessturt.com.au
