Negative Space

The City of Charles Sturt logo has been designed to stand alone. To protect the logo's status and integrity, it requires a minimum amount of negative space between other surrounding elements in which no other graphic or typographic elements intrude. This zone will avoid the logo from being over-crowded or incorrectly linked to other elements.

The space between the highest yellow 'wave' and the diamond centre (shown below as 'x') will dictate the minimum negative space necessary.

Dimensions

The minimum dimensions for the City of Charles Sturt logo are:
16mm high x 15mm wide.

The Font

'The Sans' is the typeface used in the logo branding.
